## Pete's Great Goods!

Read.  
Circle the matching problem.  
Solve.

- A. Pete has 6 treasure chests. Then he gets 5 more. How many chests does he have in all?

$$6 + 5 = \quad 6 - 5 =$$

$$\underline{\quad} \bigcirc \underline{\quad} = \underline{\quad} \text{ chests}$$

- B. Pete hides 15 necklaces on the deck. Then he moves 9 of them below the deck. How many necklaces are left on the deck?

$$15 + 9 = \quad 15 - 9 =$$

$$\underline{\quad} \bigcirc \underline{\quad} = \underline{\quad} \text{ necklaces}$$

- C. Pete sells 7 diamonds at the docks. Then he sells 6 more diamonds. How many diamonds does he sell in all?

$$7 + 6 = \quad 7 - 6 =$$

$$\underline{\quad} \bigcirc \underline{\quad} = \underline{\quad} \text{ diamonds}$$

- D. Pete stacks 9 coins. Then he stacks 5 more coins on top. How many coins are in the stack in all?

$$9 + 5 = \quad 9 - 5 =$$

$$\underline{\quad} \bigcirc \underline{\quad} = \underline{\quad} \text{ coins}$$

- E. Pete has 18 jewels. He gives 9 jewels to his mother. How many jewels does he have left?

$$18 - 9 = \quad 18 + 9 =$$

$$\underline{\quad} \bigcirc \underline{\quad} = \underline{\quad} \text{ jewels}$$

- F. Pete has 12 coins. He gives 4 coins away. How many coins does he have left?

$$12 + 4 = \quad 12 - 4 =$$

$$\underline{\quad} \bigcirc \underline{\quad} = \underline{\quad} \text{ coins}$$

**Bonus:** Circle the words in each problem that let you know whether you should add or subtract.
